If you have been finding it difficult in getting pregnant or staying pregnant, you will be glad you are here!

If you would like to learn how to reverse infertility and get pregnant quickly and safely without drugs, without risky surgery, without any typical infertility treatments and without any side effects, then you will be glad if you try this.

Get Pregnant With Organic Remedies – No Pharmaceutical Drugs

Drugs and expensive painful procedures such as IVF to treat infertility only sometimes work but the side effects and procedures are nasty. Using Organic Remedies permanently keeps off infertility and you will be able to have the number of children you have always desire.

You can get pregnant faster than you ever thought possible by balancing your body systems using the natural way provided by nature. Studies conducted at the Fertility Treatment clinic in London have showed that following certain Traditional Chinese Medicine techniques (specifically designed for each patient) can positively affect your reproductive system, and help you conceive naturally without the need of any surgical procedures such as IVF or IUI.

Some Discoveries:

Infertility Drugs May Increase the Rate of Ovarian Cancer

The New England Journal of Medicine study had found a higher rate of ovarian cancer among women who took infertility drugs.

According to the study, 3,837 women who underwent infertility treatment between 1974 and 1985 in Seattle, were analyzed by Mary Anne Rossing, D.V.M., Ph.D., at the University of Washington and the Fred Hutchinson Cancer Research Center. Among all women who had taken the drug Clomid (a drug which induces ovulation there were three times more cases of ovarian cancer diagnosed within the study period compared to women who had not taken drugs during 12 or more monthly cycles.

Clinical investigations have indicated that women taking Clomid have a 20% chance of miscarriage and a 1% chance of stillbirth.

Another clinical investigation indicated that Lupron can decrease sperm production and testicle size in men?

IVF (In Vitro Fertilization) Can Lead To Risky Multiple Pregnancies and Brain

Damage in Babies

It is a known fact that since the Westmead IVF program began in 1984, approximately 20-25% of our pregnancies have been multiple (twins or triplets). This result is similar to those obtained in other Australian IVF programs.

Multiple pregnancy (including twins) carries an increased risk of very serious consequences, including a premature birth and a nine-fold increase in the risk of cerebral palsy (brain damage) in the babies.

If You Suffer From Ovarian Disorders and You Are Not Treating Your Condition in a Timely Manner, You Might Never Have Children

Ovarian disorders, fibroids or PCOS can seriously interfere with your fertility and prevent you from becoming pregnant. By correctly diagnosing the root cause of your infertility and reversing your hormonal related disorders such as ovarian cysts in a timely manner, you are restoring the natural balance of your internal reproduction environment, and this will make it more suitable pregnancy.

Moreover, failing to treat your ovarian cysts and other insulin resistance/hormonal related disorders in a timely manner, can often lead to surgery. Doctors often decide to remove the

affected ovary or the entire uterus which will obviously leave you without the ability to ever have children.

Fertility Problems

Medical professionals discovered that most fertility problems are caused by hormonal imbalances. Take for instance, an excess of estrogen can cause conditions such as fibroids and endometriosis which cause fertility challenges.

And imbalances in Follicle Stimulating Hormone and Luteinizing Hormone can also reduce or stop menstruation, and make ovulation infrequent; giving you less chances to conceive.

Similarly, men with low sperm counts often lack sufficient levels of testosterone to produce the millions of healthy motile sperm required to conceive a baby.

Clinical studies indicate that women who have “unexplained infertility” or those who are struggling to conceive after the age of 35 could be helped by getting their hormones back into balance.

While there are many drugs on the market that work on hormone levels, they all have side effects. Some of these side effects are dangerous such as increased risk of ovarian cancer with Clomid; and side effects can stop you from getting pregnant, for example Lupron can stop menstruation, and Clomid can cause Ovarian Hyperstimulation Syndrome.

Beautifully, there are natural alternatives to these drugs. Herbs that have been used for hundreds of years to help men and women to conceive.

Modern research has confirmed that these herbs work, and double-blind clinical studies put the herbs through the strictest and most vigorous testing, and have also confirmed these herbs help you conceive faster.

Here are some of these herbs:

Dong Quai (Angelica Sinensis)

Dong Quai is believed to have a balancing or adaptogenic effect on the female hormonal system. The Department of Obstetrics and Gynecology, Kwong Wah Hospital, Hong Kong reported use of Dong Quai to help infertile women to conceive.

Dong Quai is considered the most important Chinese herb for menstrual disorders. It is used in Chinese Medicine for so many decades to treat female reproductive problems including infertility, frequent miscarriage, ovarian function disorders, uterine cramping, fibroids, endometriosis, ovarian cysts, PMT, painful periods, heavy periods and a lack of periods.

Dong quai contains many nutrients, from metals like cobalt, copper and manganese, to plant sterols, which have similar chemical structures to human hormones like estrogen which help to bring the body back into hormonal balance. It is a very good source of Vitamin B12, folic acid, choline, and iron.

Black Cohosh (Actaea Racemosa)

Formerly known as *Cimicifuga racemosa*, now *Actaea racemosa* aids in tone, regular function and shedding of the uterine lining. It helps to balance estrogen levels and relieve menstrual complaints. Black cohosh contains at least three classes of compounds that act to regulate hormone use.

Unlike many estrogenic substances, Black Cohosh is safe for women with estrogen-related problems such as endometriosis and fibroids, as it does not stimulate endometrial tissue.

Black Cohosh also has anti-inflammatory and antioxidant benefits and protects against aging and DNA damage. This is particularly helpful for women who are over 35 or who have been exposed to toxicity.

Siberian Ginseng (Eleutherococcus Senticosus)

Siberian Ginseng helps the body adapt to stress. It does this by encouraging normal functioning of the adrenal glands, allowing them to function optimally when challenged by stress and helps to boost energy levels. Ginseng stimulates the endocrine system which contains all the glands responsible for fertility and hormone balance.

Siberian Ginseng has anti-aging properties and is particularly useful for older women and it has been widely used as an aphrodisiac and as a general fertility tonic for both men and women. Siberian Ginseng also stimulates the flow of blood to the reproductive organs, and has been used to improve uterine muscles and boost the chances of successful implantation after conception.

Chaste Tree (Vitex Agnus Castus)

Chaste Tree is a normalizing herb for the female reproductive system, it is a regulator of the hormonal balance of estrogen and progesterone, it is used to balance the hormones and increase ovulation by increasing the release of progesterone, the hormone required for ovulation to take place. Chaste Tree could increase progesterone levels by an average of 56% and increase the average number of days in the Luteal Phase with basal temperatures of over 37 degrees by 42%.

In Switzerland, Researchers at Basel University found that Chaste Tree contains compounds beneficial for regulating menstruation.

93% of women in one study noticed a decrease of PMS symptoms after taking Chaste Tree for just 3 months.

An Australian Reasearcher at the University of Queensland noted that Chaste Tree is sometimes used by Professional Practitioners to help women avoid miscarriage.

We've got the results to prove it!

Success Story: Jane Tamuno

“I used your organic herbs got pregnant naturally at age 44!”

Dear Fertilconsult team, I have been trying to conceive for about 9 years now and I finally got pregnant 4 weeks after taking your powerful product „fertility capsule“. It was simply amazing. I had history of recurrent miscarriages but using your product I got pregnant naturally at age 44 and after all the fertility drugs consumed including 6 induction Clomid cycles. I also have a copy of your e-book; it is informative and very useful.

Thank you so much.

Jane Tamuno, Age 44, Port Harcourt, Nigeria

Success Story: Amaehuele Patricia

“After two months of trying, I got pregnant with my first baby girl. With an ovarian cyst, this is really amazing!”

Hello fertilconsult team, I just cannot express my gratitude because I have been fighting infertility issues for more than 10 years. My gynaecologist had already insisted that IVF was the only option left for me. I was no longer a happy woman due to all that was going through and I thought I would be childless. My husband and I decided we will keep on fighting as I have read many awful stories about the side effects, the low success rates and pain involved with the IVF procedure so we kept looking for a natural alternative.

We were almost giving up when I found your website and contacted you. You gave me words of encouragement and I immediately ordered your product, I actually ordered the fertility cleansing pack and the fertility supplement pack for myself and also ordered for my husband who had poor sperm motility. After two months of trying I got pregnant with my first baby girl. My husband is so happy.

Thank you so much.

Amaehuele Patricia, Age 44, Obiakpo LGA, PHC, Nigeria.

Success Story: Gloria Ajayi

I got pregnant naturally after 3 failed IVFs.

I'm 40 years old and my husband is 44. We've been trying to conceive for 6 years now, and had 3 rounds of failed IVF. My doctors said I couldn't develop any eggs. My FSH levels were high and progesterone levels were too low.

I luckily heard about your company and it took me some months after to order, because I was skeptical. But when I called and spoke to a live person, I realized it was real. My order got to me really quickly, and I only took two bottles and I got pregnant!

I am still so surprised! I never thought it would happen that soon. It was unbelievable!

I'm glad I followed my intuition and bought Fertility Supplement Pack. I have told my friend who is also trying to get pregnant and she hurriedly ordered, no more delay. Thank you.

Mrs Gloria Ajayi, Age 40, Lagos, Nigeria.

Success Story: Mrs Edomwonyi Amenze

My doctor said I will likely not get pregnant with my own eggs

but your organic remedies proved him wrong.

After years of trying to conceive and a failed IVF, I ordered your Fertility Supplement Pack. The doctor treating me for infertility said I will likely not be able to get pregnant with my own eggs. But I got pregnant for the first time in my life. I started with the cleansing pack I ordered and for the first time felt energized all over and I knew something was happening to me.

I had a beautiful pregnancy all through and I am glad I tried your product.

Best wishes.

Mrs Edomwonyi Amenze, Age 39, New Benin, Benin City, Edo State.

Success Story: Mrs. Enos Priscilia

“After over 7 years of trying to conceive and thousands of naira spent on infertility treatments, I finally succeeded to get pregnant the natural way without any medical intervention.

After going through 3 failed IVF cycles and several IUI"s without any results, I had started struggling to get pregnant at the age of 36 as I just don"t want to accept it that I wouldn"t have any children of my own. I got to know about your website from a younger friend who is still not yet married but is feeling my pains and she encouraged me to try, that I never can tell if the natural way will bring the solution I have been looking for.

I reluctantly place the order and found myself holding a positive home pregnancy test in less than 5 weeks! After over seven years of trying to conceive and thousands of naira spent on infertility treatments, I finally succeeded to get pregnant the natural way without any drugs or medical intervention. This is indeed a miracle, thank God for giving us natural plants, it is just the best!.

Mrs Enos Priscilia, Age 43, Benin City.

Our Research

We have researched for these herbs and we have provided you with the information on what you need to know to conceive the natural way so if you really want to conceive then grab these herbs without any further delay.

If you have all the time, equipment and expertise to measure and process the herbs and you are sure you can find them all, then get our free ebook so as to begin the process of conception but if you don"t have the time, equipment and expertise to measure and process the herbs, you don"t need to worry.

These herbs have been put together in an easy to use and convenient way. It"s also easier to take the herbs in capsule form, as the capsules don"t have any taste and are easy to swallow.

The herbs "Fertility Supplement" is sold in a pack to help you take the right quantity to achieve your desired results.

To know more about these natural herbal remedies or if you will like to get pregnant by putting these natural herbal remedies together yourself, then get our full eBook "Understanding Nature's Solutions for Pregnancy".

Success Story: Oyin Williams

I became pregnant at age 40

I have had several miscarriages, my husband and I have waited for pregnancy to happen for more a decade and we have spent so much money on consultation and drugs but all failed. I was booked for IVF by my doctor but a friend of mine advised that before going for the IVF I should take your fertility supplement first, that it will increase the chances for the IVF to be successful and also it will help bring my body back to balance.

I reluctantly yielded to all she asked me to do and ordered your fertility supplement for myself and my husband, all I wanted was to use it to balance my body before going for the IVF but to our greatest surprise I became pregnant before I could finish the third bottle.

My husband and I appreciate my friend for her advice; I hurriedly went back to her to share the good news.

Thank you so much and may God bless you.

Oyin Williams, age 40, Lagos.
